

**HEADWAY CORPORATE RESOURCES AND SCINTELLIX, LLC
ANNOUNCE JOINT VENTURE TO LAUNCH
HEADWAY LIFESCIENCE RESOURCES**

RALEIGH, N.C. —January 31, 2007— Headway Corporate Resources, a full-service human resources support company that provides executive recruiting, staffing and human resource support services to a range of business sectors, today announced that the Company has entered into a joint partnership with Scintellix, LLC, a biomedical technology consulting firm, in a newly created service offering, **LifeScience Resources**.

Consumer demand for improved healthcare is driving the life science industry, opening up a wealth of opportunities in the employment marketplace. Because the industry is congested with a variety of specialized fields, the search for appropriate talent is endless and often inefficient. Headway LifeScience Resources combines the capabilities of the Tarboro, NC Headway Resource Center's (HRC) unique talent identification engine with the domain expertise and networks of Scintellix to optimize life sciences sourcing and placement processes. As part of its executive search and staffing support, the HRC serves as a research backbone for candidate identification, background checks and verification service, and the generation of databases. This joint venture cements Headway Corporate Resources' position as a premier identifier of accessible talent for the life science industry.

"We are pleased to join forces with Headway," said Peter Johnson, M.D., F.A.C.S., Scintellix's CEO and President. Dr. Johnson continued, "We are proud that our companies have chosen to be a joint anchor in the life science corridor by expanding our existing businesses. Scintellix's network of doctors and consultants continue to support biomedical technology development worldwide. With an abundance of employment opportunities, Headway and Scintellix are poised to be a major life science resource for individual candidates and businesses."

"This groundbreaking partnership with Scintellix highlights Headway's commitment in the life science sector," said J.P. Sakey, Headway's CEO and President. Sakey continued, "Our collaboration with a leading life science consulting firm has created a unique opportunity to enhance the careers of industry professionals and help the life science professionals of the future. We are also fortunate to have someone of Peter's stature join us at Headway and we look forward to building the LifeScience Division together."
